PROFILE

AI Project Manager Assistant · Data Engineer · AI Agents Engineer. Hybrid finance / tech profile, AMF-certified (French market regulator), able to scope (PRD, roadmap, discovery), prototype and ship agentic AI projects end-to-end — from business need to production. Founder of EPTA5 Inc (SAS), a B2B financial data platform (Bloomberg-style) with RAG-based AI, Cloudflare edge architecture and AES-256-GCM encryption — designed, shipped and operated solo (end-to-end project owner). I translate business requirements (structured products, wealth management, regulatory reporting) into actionable technical specs and AI agents (RAG, BYOK, HITL, multi-agent) — available for consulting or fixed-price engagements, France and international.

TARGET ROLES

- **AI Project Management:** scoping, PRD, roadmap, discovery, stakeholder management, OKRs, MVP, business workshops — agile delivery coordination.
- **AI Agent Design:** multi-agent architecture, RAG, BYOK, HITL (human-in-the-loop), tool use, function calling, guardrails, evals, observability, production deployment.
- **Data Engineering:** Python ETL / ELT, GitHub Actions automation (20+ pipelines), data modeling, Power BI / Looker dashboards.
- **Business ↔ Tech bridge:** business need → spec translation, AI evangelism for finance leadership, GDPR compliance & security (AES-256-GCM, OTP, CSRF).

(in progress)

EPTA5 Inc (SAS) - Founder, Project Owner & Developer

- **Solo end-to-end project owner** — scoping, PRD, roadmap, delivery, production rollout, operations.
- B2B financial data platform (Bloomberg-style): **RAG-based AI + BYOK system** for news ingestion and Q&A.
- **Data engineering & cleaning** (data analyst stance): 20+ Python pipelines automated via GitHub Actions / YAML cron jobs, fed by multiple external financial APIs (macroeconomic data, time series, historical equity prices) — with deduplication, normalization and missing-value handling.
- **Vendor benchmarking & cost / quality trade-off**: rational selection of cloud services, APIs and third-party components to maximize technical quality while minimizing TCO.
- **100 % serverless edge architecture** (Cloudflare Workers / D1) with **7+ integrated security mechanisms**: AES-256-GCM, OTP, CSRF, Turnstile, session rotation, rate limiting, GDPR compliance — operated solo.

2024 - 2025

Power BI Backtesting Engine - Personal project

- Multi-variable dashboard — **5+ technical indicators** + full economic calendar (including central bank speakers).
- Advanced DAX — **4+ financial KPIs**: entry / exit signals, Sharpe ratio, max drawdown, win rate.

2024 - 2025

Investment-Insight & Together Growth - Student projects

- Investment-Insight: equity risk evaluation using **4 methodologies** (DCF, PEG, VaR, Altman Z-Score) — automated ratio modeling.
- Together Growth: market data collection and analysis, Python automation (returns, volatility, scoring).
